DETAILED ACTION

Election/Restrictions

Claims 1-38 and 65-67 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/30/05.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 56-64 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In Claim 56, "at least electrode" is incomplete.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 39, 41, 47, 50 and 51 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Ben-Haim, WO99/03533. Stimulation in the Ben-Haim device

would inherently compensate for loss of acute response as claimed. As to Claim 51, in this instance, the intended use does not further limit the structure.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 40, 42, 43, 48 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ben-Haim as applied above.

As to Claims 40, 42, 43 although the specific hormones effected are not discussed in the Ben-Haim reference, it would have amounted to routine experimentation to those of ordinary skill in the art to have altered any hormones via pancreatic stimulation give the teachings of Ben-Haim, for example at column 25, lines 25-57.

Allowable Subject Matter

Claims 52-55 are allowed.

Claims 44-46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 56-64 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
